Letter of Recommendation

Alexandru Hotescu joined FUN labs Romania in May 2012 as a 3D modeler. His modeling skills and artistic academic education and the truly dedication to 3d sculpture enabled him to deliver fine and expressive models. His true artistic abilities are mainly pointed out by high resolution modeling in 3D software such as Zbrush, although he managed to acquire experience in other modeling areas such as re-topology and mapping.

He has great potential as a 3D artist and his fresh and energetic interest in this field can make him an important team member. We believe that he will be a valuable asset for any company that would choose to hire him.

Mihai PREDA
Department Lead
